SONIDO GALLO NEGRO

VIDEO REQUIREMENTS

1. LED DISPLAY ON THE BACK – OPTION 1
2. VIDEO PROJECTOR MINIMUM 2600 LUMENS – OPTION 2

IMPORTANT

The same musician that plays the THEREMEIN controls the visual show of SONIDO GALLO NEGRO.

For LED DISPLAY we need a HDMI or VGA cable on stage (look at the stage plot of the rider) in order to connect a computer.

For a VIDEO PROJECTOR we need a HDMI or VGA cable from the projector to the stage (look at the stage plot of the rider)

In the back of the musicians we need a white screen to project or the back can be white, not necessary a screen, but the projector must be in front of the stage in a correct distance so the projection can be seen clearly from the audience. The bigger the projection, the better.

Please write to production contacts for any question.

SONIDO GALLO NEGRO
